and NSD File No. L-00-72.

Dear FCC:

Dear FCC,

I cannot understand why you have to continually find ways for the consumers to pay more fees.

I have just switched to tracfone from a wireless monthly service because it was becoming too expensive.

I like many others use my phone strictly for emergency type situations. I have 4 friends who use their tracfones

exactly the same way. Our government is taxing and charging the little guy too death and it is ridiculous.

Basically the government does these things because they feel a piece of the pie is bypassing them.

Can't you leave well enough alone and not tax us a dollar because you can spend it.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,

Marilyn Decker
